

Product Backlog				
Priority	Item	Details	Task Link	Initial Points Estimate
	WDU-79 Booking Service Get Bookings By Date Implementation	Implement all the service necessary parts to make the BookingService able to receive "get bookings by date" requests and get them through the store. This will imply the communication between this service and the Analytics Service to complete all the "Get Bookings" process and respond to the analytics service. This task will be considered as done when written tests will be passed.	https://trello.com/c/dh4hBook	3
2	WDU-69 Link libraries docs to our sources docs		https://trello.com/c/n9TONRmG	5
3	WDU-91 Analytics Service Request Bookings	When a back office request a booking report the analytics service will ask to the booking service all the needed data to be manipulated to build a booking report. This task will be considered as DONE when the related tests will be passed and a build of the system will be completed without errors.	https://trello.com/c/ufBIIV7e	5
4	WDU-90 Analytics Service Booking Report	Manipulate bookings data to build a booking report and send back that report to the specific back-office. This task will be considered as DONE when the related tests will be passed and a build of the system will be completed without errors.	https://trello.com/c/loP5v9m2	7
5	WDU-98 Analytics Service BackOffice Startup Request	When a BackOffice starts it will ask to the analytics service the initial data as counters. The analytics service must register to this event (through rabbitmq) and send to the backoffice the needed counters. This task will be considered as DONE when the related tests will be passed and a build of the system will be completed without errors.	https://trello.com/c/NqwtlwQA	5
